QUESTION NO: 5

Your client has loaded the F0411Z1 table to perform the voucher match automation process but wants to change the automation rule for one of several invoices for the same supplier. Which two options will help your client solve the problem? (Choose two.)

- A. Change the Automation Rule on the Supplier Master record.
- B. Manually update the information using the P0411Z1 program for the invoice record only if Process Type is equal to 2.
- C. Manually update the information using the P0411Z1 program for the invoice record only if Process Type is equal to 1.
- D. Use the Batch Voucher Revisions program to delete the record from the F0411Z1 table and then add the record back with the desired automation rule.

ANSWER: C D

QUESTION NO: 6

Your client created a journal entry to add cost for some fixed asset records, but is having trouble finding the batch in fixed assets in order to post the G/L entry to Fixed Assets. With no access to the system, which two items should your client verify? (Choose two.)

- A. The accounts used on the journal entry are within the FX range of accounts in the AAls.
- B. The accounts used on the journal entry are within the FD range of accounts in the AAls.
- C. The journal entry included on asset number.
- D. The entry was posted to the G/L (the G/L posted code is equal to P).
- E. The accounts used on the journal entry are within the AT range of accounts in the AAls.

ANSWER: A C

QUESTION NO: 7

Your client used the Mass Asset Disposal program to dispose of several assets belonging to the same company. They used the simple disposal method but the business unit for the net book value account contained in the journal entry was different for almost every asset they disposed.

Which statement explains why this occurred?

- A. The Mass Asset Disposal program select the NBV account by company from the Disposal Account Rules and the business unit from the FX range of AAls based on the cost account of the individual assets.
- B. The Mass Asset Disposal program uses a combination of the Disposal Account Rules by company for the NBV account and the Location Business Unit field on the asset master record for the business unit.
- C. The Disposal Account Rule for NBV did not contain a business unit value.
- D. The Disposal Account Rules for the company were set up with multiple business units for the NBV account.

ANSWER: B

QUESTION NO: 8

Your client wants the system to automatically create journal entries for intercompany settlements. Knowing that your client will use multicurrency processing, what two intercompany settlement values are available to your client? (Choose two.)

- A. 1: Hub Method
- B. 2: Detail Method
- C. 3: Configured Hub Method
- D. N: The system does not post a batch if it contains intercompany settlements.

E. *: The system posts a batch even if it contains intercompany settlements.

ANSWER: A B

Explanation:
