QUESTION NO: 1

Consider the following code:

Which of the following is true based on the above code?

- A. The function sofaPic will be called upon when sofaPic image loads
- B. The function sofaPic is called when the image fails to load
- C. The function sofaPic is called when the mouse pointer moves off the image
- D. The function sofaPic is called when the mouse pointer moves over the image

ANSWER: B

QUESTION NO: 2

Consider the following code:

```
<script type="text/javascript">  
var myString = "Dear John";  
alert(myString.substring(2, 6));  
</script>
```

What text will display in the alert dialog box?

- A. Ear J
- B. Ar Jo
- C. Ear Jo
- D. Ar J

ANSWER: D

QUESTION NO: 3

Consider the following code:

```
<!DOCTYPE html>
<html>
<head>
<title>Join our Mailing List</title>
<meta charset="utf-8" />
</head>
<body>
<script type="text/javascript">
function processForm(){ alert("Form Submitted"); }
</script>
<form name="myForm">
First Name: <input type="text" name="firstName" />
Email: <input type="text" name="email" />
<input type="submit" value="Submit" />
</form>
</body>
</html>
```

The processform() function is not executed when the submit button is pressed. What change should be made to correct this?

- A. The onsubmit event handler should be added to the `<input type="submit" value="Submit" />` tag.
- B. The onsubmit event handler should be added to the `<input type="text" name="email" />` tag.
- C. The onfocus event handler should be added to the `<input type="text" name="email" />` tag.
- D. The onfocus event handler should be added to the `<input type="submit" value="Submit" />` tag.

ANSWER: A

13 </form>
```

Charies wants to write code to execute the changeOption function after the user chooses an option in the select menu. What change to the code should he make?

- A. Change line 7
- B. Change line 2 to function changeOption (onchange){
- C. Change line 6 to
- D. Change line 6 to

ANSWER: A

QUESTION NO: 7

Which of the following statements is an advantage of using JavaScript on the server-side?

- A. Server-side validation conserves more bandwidth than client-side validation
- B. Server-side JavaScript runs the script on the server, thus eliminating compatibility problems with client-side browsers
- C. Server-side JavaScript requires less processing power on the server level than client-side JavaScript
- D. Server-side JavaScript results in a higher level of end-user satisfaction

ANSWER: A

QUESTION NO: 8

Consider the following code.

```
<input id="age" value="0" />
<button onclick="ageTest()">Enter your age.</button>
<p id="test"></p>

<script type="text/javascript">
function ageTest() {
    var age, test;

    age = document.getElementById("age").value;

    test = (age >= 25) ? "You are old enough":"You are not old enough";
    document.getElementById("test").innerHTML = test + " to rent a car from our car rental agency.";
}
</script>
```

Which of the following will occur if the user's response is 25?

- A. The response will not be tested due to an error in the line containing the conditional operator.
- B. The statement "You are not old enough to rent a car from our car rental agency " will be displayed.
- C. The statement "You are old enough to rent a car from our car rental agency " will be displayed.
- D. The statement "You are not old enough" will be displayed in an alert box.

ANSWER: D

QUESTION NO: 9

Consider the following code:

```
1 <script type="text/javascript">
2 function supportTicket(date, name, email, item, description){
3     this.date = date;
4     this.name = name;
5     this.email = email;
6     this.item = item;
7     this.description = description; }
8 var ticket1 = new supportTicket("2017-06-05", "Ryan Nuen", "ryan.nuen@ciwcertified.com", "GTQ6741", "The computer
will not connect to the Internet.");
9 supportTicket.prototype.resolved = false;
10 var ticket2 = new supportTicket("2017-06-06", "Eliza Cruke", "eliza.cruke@ciwcertified.com", "GTQ3561", "I need
the network printer in office 203 installed on my computer.");
11 </script>
```

What does line 9 do?

- A. Nothing it must written as supportTicket. prototype, this, resolve = resolve ; to add the properly resolved to the custom supportTicket object
- B. it add the property resolved to the original instantiated custom supportTicket object ticket1.
- C. it add the property resolved to the newly instantiated custom supportTicket object ticket1.
- D. it add the property resolved to all instances instantiated custom supportTicket object ticket1 and ticket2.

ANSWER: B

QUESTION NO: 10

Which script will display Congratulations, you won! In the browser when the script is run?

A)

```
<script type="text/javascript">
var congrats1 = "Congratulations, ";
var congrats2 = "you won!";
document.write(congrats1 + congrats2);
</script>
```

B)

```
<script type="text/javascript">
var congrats1 = "Congratulations, ";
var congrats2 = "you won!";
windows.write(congrats1 + congrats2);
</script>
```

C)

```
<script type="text/javascript">
var congrats1 = "Congratulations, ";
var congrats2 = "you won!";
document.prompt(congrats1 + congrats2);
</script>
```

D)

```
<script type="text/javascript">
var congrats1 = "Congratulations, ";
var congrats2 = "you won!";
alert.document(congrats1 + congrats2);
</script>
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

ANSWER: B
