<b>Total</b>	<b>523</b>

## QUESTION NO: 1

existFusionInsight HDcluster, aboutkinitOperation command, which of the following statements is wrong? (multiple choice)

- A. Only the HMI account can be used.
- B. Only the machine account can be used.
- C. A client does not support the simultaneous use of multiple accounts.
- D. The ticket obtained by executing this command is intwenty fourIt will time out when it is small and needs to be executed againkinitcommand to log in again.

ANSWER: A B C

## QUESTION NO: 3

An application requires simultaneous and twoFusionInsightsCluster interaction: both need to access the cluster1ofHBaseservice, need to visit

Ask the cluster2ofHiveServe;

So which of the following operations are required? (multiple choice)

- A. in the cluster1Create the account required for this application on theHBaseServe
- B. in the cluster2created onAThe account with the same name in the options, and set this account to be able to access the cluster'sHiveServe
- C. Aoptions andBThe account created by the option must belong tosupergroupGroup
- D. cluster1and cluster2Complete the mutual trust operation

ANSWER: A B D

## QUESTION NO: 4

FusionInsight HDofStreamingforZooKeeperweak dependency, even ifZooKeeperFault

StreamingServices can also be provided as normal.

- A. True
- B. False

ANSWER: B

## QUESTION NO: 5

.existFusionInsight HDin, useSparkSQL, which of the following methods (or tools) can be used to performSQLstatement?

(multiple choice)

- A. JDB, C
- B. spark-beeline
- C. spark-sql

ANSWER: A B C

## QUESTION NO: 6

existSparkmiddle,SparksQLis an independent module that does not depend onSparkCorefinish independentlySQL Actions such as the corner line of the statement.

- A. True
- B. False

ANSWER: B

## QUESTION NO: 7

aboutStreamingdisaster recovery capability, which of the following statements is correct? (multiple choice)

- A. SupervisorAfter the process exits, it can beNimbusAutomatically identify and pull up without affecting running business.
- B. WorkerCan be used after abnormal exitSupervisorPulls up automatically without manual intervention.
- C. When a node fails, the tasks on the node will be reassigned to other normal nodes without manual intervention.
- D. NimbusAfter the failure, the backupNimbusIt will take over automatically without affecting the running business.

ANSWER: A B C D

## QUESTION NO: 8

A project needs to count the Internet access in a certain area and the serious crime in the area. Please make it clear that Nanyao teaches Huajin that it needs to be preserved, and fully check this

Are there sensitive information in these Internet records for pre-optimal solutions?

- A. existsorCreate an index on the database, save the data, and return all the data when the full text is checked.
- B. existHBasestore data on theHBaseThe filtering characteristics of , satisfy fuzzy matching query.

- C. When storing data, in Solr On the construction of information, through the customs messenger is on the electricity, if the lack of quality, Wan Mo dad will put the complete data,
- D. When querying, by sor Full-text search to obtain record key

**ANSWER: D**

## QUESTION NO: 9

FusionInsight HD Which of the following belong to Oozie of MapReduce Action configuration item? (multiple choice)

- A. name-node
- B. source
- C. mapred.mapper.class
- D. job-tracker

**ANSWER: A C D**

## QUESTION NO: 10

about FusionInsight HD of Spark, which of the following programming languages can be used to develop Spark application? (multiple choice)

- A. C
- B. Scala
- C. Java
- D. Python

**ANSWER: B C D**

## QUESTION NO: 11

FusionInsight HD In, use Streaming of Linux When submitting a topology in command line mode, you need to first use a StreamingUser with submit permission kinit way authentication

- A. True
- B. False

**ANSWER: A**

## QUESTION NO: 12

FusionInsight HD in, about Hive UDFs Secondary development, is the following description correct? (multiple choice)

- A. user defined UDF Before being used, it needs to be Hive create this in the system UDF.
- B. user defined UDF, information such as summary and status is not allowed.
- C. user defined UDF, can be added according to the actual situation deterministic and stateful etc. Annotation
- D. Under the secure cluster, user-defined UDF, it is recommended to create it once before each use.

ANSWER: A

## QUESTION NO: 13

FusionInsight HD in, about Hive the data load function (via Hive of LOAD command guide input data), which of the following descriptions is wrong?

- A. available from HDFS directly into the Hive surface
- B. available from Hive Server The local hard disk of the node is directly loaded into the Hive surface
- C. It can be directly loaded from the local hard disk of the node where the client is located. Hive surface
- D. Hive The data loading process does not parse the specific file content, mainly the process of file transfer

ANSWER: C

## QUESTION NO: 14

about streaming disaster recovery capability, which of the following statements is correct? (multiple choice)

- A. Supervisor After the process exits, it can be Nimbus Automatically identify and pull up without affecting the running business
- B. Worker Can be used after abnormal exits supervisors Pulls up automatically without manual intervention
- C. When a node fails, the tasks on the node will be reassigned to other normal nodes without manual intervention
- D. Nimbus After the failure, the backup Nimbus It will take over automatically without affecting the running business

ANSWER: A B C D

## QUESTION NO: 15

When a task is submitted to YARN in the cluster, which of the following options will generate a job id?

- A. ResourceManager
- B. Container
- C. AppMaster
- D. NodeManager

**ANSWER: A**

## QUESTION NO: 16

fusioninsightHD in which ways can you view Oozie Debug results of the job? (multiple choice)

- A. mouth viewOozieofJava APIWhether the returned result is as expected
- B. mouth throughHueofworkflowDashboard to view program running results
- C. mouth throughHue's file browser to see ifHDFSThe specified directory produces the expected file
- D. mouthOozieself-containedWebThe interface can also view the job execution results

**ANSWER: A B C D**

## QUESTION NO: 17

existSparkIn application development, which of the following codes can correctly count words?

- A. `rval counts = textFile.map(line => line.split("")).map(word =>(word, 1)).reduceByKey(+)`
- B. `val counts = textFile.flatMap(line => line.split("")).map(word =>(word, 1)).reduceByKey(+)`
- C. `vrval counts = textFie.map(line => line.split("")).map(word =>(word, 1)).groupByKey( )`
- D. `vrval counts = textFile.flatMap(line => line.split("")).map(word =>(word, 1)).groupByKey( )`

**ANSWER: A**

## QUESTION NO: 18

existFlumeDuring cascaded transfers, you can usefail overmode transfer, so that if the next hop isFlumenode failure or When the data is received abnormally, it can automatically switch to another way to continue transmission.

- A. True

B. False

**ANSWER: A**

## QUESTION NO: 19

aboutRedisCluster topology information, is the following description correct?

- A. The client caches the topology information of the cluster
- B. The server caches the topology information of the cluster
- C. both are
- D. more than two

**ANSWER: C**

## QUESTION NO: 20

FusionInsight HD a completeStreaming CQLThe application contains at least which of the following part? (multiple choice)

- A. Create an input stream
- B. Create output stream
- C. Business action statements (such asSELECT,INSERT,JIONWait)
- D. Apply commit statement

**ANSWER: A B C D**
