QUESTION NO: 1

Which two methods can be used to capture Avaya IP Office call activity on the System Status Application (SSA)? (Choose two.)

- A. Copy snapshot
- B. Continuous log
- C. Save as
- D. Snapshot only
- E. Copy log

ANSWER: A B

Explanation:

The two methods that can be used to capture Avaya IP Office call activity on the System Status Application (SSA) are:

QUESTION NO: 2

During a standard installation of Avaya IP Office Server Edition, which three parameters should be known to the installer? (Choose three.)

- A. IP Address/Subnet
- B. DDI/DID
- C. Root Password
- D. Server Name
- E. Trunk ID

ANSWER: A C D

Explanation:

During a standard installation of Avaya IP Office Server Edition [\[1\]](#), the three parameters that should be known to the installer are IP Address/Subnet, Root Password, and Server Name. DDI/DID and Trunk ID are not parameters that need to be known to the installer.

QUESTION NO: 3

What are three common licenses that are valid for the Avaya IP Office Primary Server? (Choose three.)

- A. Server Edition
- B. SIP Trunk Channels
- C. Power User
- D. IPSec Tunneling
- E. PRI Channels

ANSWER: A B E

Explanation:

The three common licenses that are valid for the Avaya IP Office Primary Server are Server Edition, SIP Trunk Channels, and PRI Channels. Power User and IPSec Tunneling are not valid licenses for the Primary Server.

QUESTION NO: 4

On an Avaya IP Office, the Line Group ID has a functional dependency to which two parameters? (Choose two.)

- A. Incoming Call Route (ICR)
- B. Alternate Route Selection (ARS)
- C. Time profile
- D. Hunt group
- E. Voice recording

ANSWER: A B

Explanation:

On an Avaya IP Office, the Line Group ID has a functional dependency to both the Incoming Call Route (ICR) and the Alternate Route Selection (ARS). It does not have a functional dependency to the Time Profile, Hunt Group, or Voice Recording.

Reference:

QUESTION NO: 5

On an Avaya IP Office solution, which feature will allow incoming calls to be routed appropriately during business hours?

- A. Time Profile
- B. IP Protocol
- C. Firewall Profile
- D. Alternate Network Selection

ANSWER: A

Explanation:

Time Profile feature will allow incoming calls to be routed appropriately during business hours. The Time Profile feature allows you to create different profiles for different times of the day, and then assign different routes for incoming calls based on the active profile. For example, you could route calls to the main line during business hours, and to a voicemail box after hours.

QUESTION NO: 6

Which Voicemail Pro solution is only supported with IP Office Select?

- A. Dual Voicemail Pro
- B. Centralized Voicemail Pro
- C. Stand-alone Voicemail Pro
- D. Distributed Voicemail Pro

ANSWER: C

Explanation:

The Voicemail Pro solution that is only supported with IP Office Select is Stand-alone Voicemail Pro. Stand-alone Voicemail Pro is designed for IP Office Select deployments and provides a range of features such as auto attendant, an integrated web interface, and support for multiple languages. It can be used as a stand-alone voicemail solution, or it can be integrated with other Avaya IP Office solutions for a more complex unified communications solution.

QUESTION NO: 7

On an Avaya IP Office customer system, only three out of four analog trunks are connected to a provider. Which solution for the fourth trunk port would not impact the operational trunks?

- A. The Line Appearance ID should be set to 700
- B. No settings are needed
- C. The Line Group ID needs to be set to Default

D. The Trunk has to be set to Out of Service using SSA

ANSWER: B

Explanation:

no settings are needed for the fourth trunk port that is not connected to a provider. This will not impact the operational trunks. The Line Appearance ID should not be set to 700, the Line Group ID does not need to be set to Default, and the Trunk does not have to be set to Out of Service using SSA.
