QUESTION NO: 1

Your company wants to establish a new human resources management application. As tester, you propose to use an ATDD approach and to use business process models for test case design.

Which of the following statements is the LEAST meaningful argument for this approach?

- A. The process models will help testers to understand the use cases to be tested.
- B. Testers will be able to show test coverage directly within the graphical representation of business processes.
- C. Business process models will make it easier to detect defects in the application code.
- D. As business process models will be updated to maintain the tests, they will be a living documentation of the product.

ANSWER: C

QUESTION NO: 2

Which one of the following usability testing techniques matches the test objective BEST?

- A. Expert reviews help to understand how users interact with a system and what is more or less visible.
- B. Biometrics-based evaluation help to understand retrospectively, how users interacted with the system and to improve it.
- C. Log file analysis performed by usability experts identifies strong points of an interface that attract the user's attention.
- D. Walkthrough and thinking aloud methods can indicate difficulties users experience with certain tasks.

ANSWER: D

QUESTION NO: 3

Which one of the following statements defines beta testing BEST?

- A. Beta testing is performed by developers at the customer's location.
- B. Beta testing takes place early in the development process to acquire feedback from the market.
- C. During beta testing, genuine users define the acceptance criteria for various realistic configurations.
- D. Beta testers discover defects in the product that escaped during the development process.

ANSWER: D

QUESTION NO: 4

You are leading a brand new project team whose members are coming from all over the organization and have no former experience in working together. You need to build a common vision and team spirit. What workshop would fit BEST:

- A.** You invite the team members and ask them to design their own (team-wise) emblem representing their values, beliefs, goals, tasks together than a common motto.
- B.** You invite every member in turn to describe his/her past experience and his/her major achievements in the organization or in their former job.
- C.** You ask every member in turn to write down three things he/she likes and dislikes in the organization and to post them on a wall. A volunteer is then chosen to read randomly some posts that are then discussed with the group.
- D.** You draw a staircase with 11 steps, each of them representing a major milestone of the project. The bottom of the stairs corresponds to the first day of the project and the upper step means that the project is released. You locate the present situation in the top of the stairs. The team is asked to identify and discuss the major steps downwards.

ANSWER: A

QUESTION NO: 5

Which one of the following statements describes correctly how acceptance testing may be augmented with other test techniques or approaches?

- A.** In a model-based testing approach, acceptance tests are generated from graphical or textual models.
- B.** In a priority-based testing approach, prioritization of acceptance tests depends on identified product risks.
- C.** In a risk-based testing approach, acceptance criteria are derived from the tester's experience and intuition.
- D.** In a black-box testing approach, acceptance test scenarios follow the implemented sequence of function calls in the code.

ANSWER: A
