QUESTION NO: 1

Is the following statement about the introduction of frequency planning correct ()?

(Select 2 Answers)

- A. 2.4GHz generally uses 1, 6, 11 three non-overlapping channels for coverage
- B. In China, 5GHz generally has 23 non-overlapping channels available
- C. Microwave interference will occur in the entire 2.4GHz frequency band
- D. If the AP is dual-band, it is recommended to use the 5G priority function

ANSWER: A D

QUESTION NO: 2

The antenna gains gain through ().

- A. Use power amplifiers in antenna systems
- B. Make the antenna radiation more concentrated
- C. Use high-efficiency antenna feeder
- D. Use equipment with low standing wave ratio

ANSWER: B

QUESTION NO: 3

pass through FTP Way to upgrade AP, You need to ensure AP and FTP Servers can communicate with each other, and AP Put the upgrade file in FTP Root directory.

- A. True
- B. False

ANSWER: A

QUESTION NO: 4

WLAN When configuring the network, WMM Which of the following templates should the template be bound to ()?

- A. radio-profile
- B. traffic-profile
- C. security-profile
- D. service-set

ANSWER: B

QUESTION NO: 5

802.11 In the frame, it means that the wireless station AP When sending a signal, To DS and From DS What are the values of ()?

- A. 0,0
- B. 0,1
- C. 1,0
- D. 1,1

ANSWER: C

QUESTION NO: 6

The following statement about the AP access control method is incorrect ().

(Select 2 Answers)

- A. By default, the control method for AP to access AC is non-authentication
- B. By configuring the AP in an offline state, authentication is required to automatically access
- C. The configuration whitelist can be authenticated based on MAC or SN
- D. If MAC authentication is used for AP access control, APs outside of the MAC authentication list can also go online after manual confirmation

ANSWER: A B

QUESTION NO: 7

Which of the following functions does the Huawei WLAN planning tool have ()?

(Select 3 Answers)

- A. Support automatic identification of obstacles
- B. Support the division of general coverage areas and key coverage areas
- C. Support automatic deployment of AP locations
- D. Support exporting standardized WLAN planning reports

ANSWER: B C D

QUESTION NO: 8

2.4 GHz What is the frequency band US non-overlapping channel ()?

- A. 2,7,12
- B. 3,8,13
- C. 1,6,11
- D. 3,7,13

ANSWER: C

QUESTION NO: 9

What are the general methods to solve co-channel interference (). (Select 3 Answers)

- A. adjust AP Transmit power, adjust antenna feeder
- B. Reasonable frequency reuse to ensure that the same channel does not appear in the same or adjacent coverage areas
- C. Use omnidirectional antennas for coverage
- D. Use obstacles for natural isolation

ANSWER: A B D

QUESTION NO: 10

For one adopts WPA2 PSK Certified and SSID For broadcast wireless networks, users can double-click the username and password to access the network. SSID And enter the correct use

- A. True
- B. False

ANSWER: B

QUESTION NO: 11

Which of the following is correct about the power calculation ()?

(Select 3 Answers)

- A. 0 dBm = 1 mW
- B. 3 dBm = 2 mW
- C. 10 dBm = 100mW
- D. 27 dBm = 500mW

ANSWER: A B D

QUESTION NO: 12

Which of the following devices belong to Huawei Wireless Dual Band AP(Access Point)?

(Select 2 Answers)

- A. AP5010DN
- B. AP5010SN
- C. AP6010SN
- D. AP6010DN

ANSWER: A D

QUESTION NO: 13

802.11 In the frame, Address Which address bit represents the address of the receiving end of the frame ()?

- A. Address 1
- B. Address 2
- C. Address 3
- D. Address 4

ANSWER: A

QUESTION NO: 14

The following pairs PSK The authentication description is wrong ().

- A. PSK Authentication requires the same pre-shared key to be configured on the wireless client and device
- B. WPA and WPA2 All support PSK Certification
- C. PSK The authentication process is similar to the shared key authentication process, so the security is the same
- D. PSK Certification is passed 4 Handshake Key Negotiate to verify STA side Key The legitimacy

ANSWER: A

QUESTION NO: 15

for dBm ,dB,dBi, The following description is correct ().

(Select 3 Answers)

- A. dBm : Absolute value of characterizing power
- B. dBi and dBd : Characterize the relative value of gain
- C. dB The relative value of characterizing power
- D. If the antenna of A is 12dBi , The second antenna is 14dBi , It can be said that A is smaller than B 2dBi

ANSWER: A B C
