## QUESTION NO: 1

In addition to the features of the CloudBees Folders plugin, which will CloudBees Folders PLUS allow you to do? Choose 2 answers

- A. Restrict an agent to a folder.
- B. Assign an administrator to a folder.
- C. Enable logging for a folder.
- D. Restrict which kinds of items may be created in a folder.

**ANSWER: A**

## QUESTION NO: 2

Which of the following are true about Declarative Pipelines: Choose 3 answers

- A. Declarative syntax can express complex flows and conditionals.
- B. A Jenkinsfile can express the entire CI/CD process as code that is stored in a Source Code Management system.
- C. Execution can be resumed after most failures.
- D. The Jenkinsfile can incorporate any valid Apache Groovy code.
- E. Declarative Pipeline uses the Pipeline domain specific language (DSL) to manipulate Jenkins objects.

**ANSWER: A B C**

## QUESTION NO: 3

You are using GitHub repository scanning (in a project of type "GitHub Organization") with the Pipeline Jenkinsfile Project Recognize In this case, which repositories under the organization will have Multibranch projects automatically created for them?

- A. only repositories that contain a Jenkinsfile in all their branches
- B. all repositories that contain a Jenkinsfile in at least one branch or pull request
- C. all repositories

C. only repositories that contain a Jenkinsfile in at least one branch

**ANSWER: B**

## QUESTION NO: 4

Which are direct benefits of using the CloudBees Core Operations Center?

Choose 2 answers

- A. Operations Center enables you to interconnect different CI systems, such as CloudBees CodeShip and Jenkins
- B. It is easier to share resources among Jenkins masters that are connected to the same Operations Center.
- C. It is easier to run Pipelines on the Operations Center because it can retrieve resources from all connected masters.
- D. Operations Center handles the build load more efficiently by scheduling tasks on idle Jenkins masters.
- E. It is easier to perform administration tasks (such as upgrading a plugin) on a group of masters that are attached to the same Operations Center.

**ANSWER: A D**

## QUESTION NO: 5

You are using the Jenkins CLI to communicate with a remote Jenkins master. Which are valid ways to authenticate your identity to gain access?

Choose 2 answers

- A. A Jenkins user's username and password or API token.
- B. A Jenkins user's username and GitHub API token.
- C. A Jenkins user's username and Kerberos token.
- D. An SSH key matching an entry in the `authorized_keys` file of the user account that the Jenkins master process runs "as".
- E. An SSH key matching a Jenkins user's public key.

**ANSWER: A C**

## QUESTION NO: 6

Which features are provided through the Folders Plus plugin?

Choose 3 answers

- A. Provide environment variables that will be available during builds.
- B. Display the worst status for a job inside the folder.
- C. Provide an icon for the folder using a URL.
- D. Count jobs with different statuses.

ANSWER: A C D

## QUESTION NO: 7

Which of the following would correctly complete the sentence, "Continuous Integration is a \_\_\_\_\_ of Continuous Delivery"?

Choose 2 answers

- A. superset
- B. consolidation
- C. process definition
- D. requirement
- E. subset

ANSWER: C E

## QUESTION NO: 8

Where are fingerprints stored on disk ?

- A. In \$JENKINS\_HOME/fingerprints.
- B. Inside each artifact fingerprinted (under \$JENKINS\_HOME/jobs/myJob/builds).
- C. Inside each job which fingerprints artifacts (\$JENKINS\_HOME/Jobs/myJob).

D. In the Workspace of each Job.

**ANSWER: B**

## QUESTION NO: 9

A Source Code Management system records and tracks all changes of a source code repository. What is the feature that enables an SCM system to notify other systems when such changes happen?

- A. Polling
- B. Webhooks
- C. Version Control
- D. Tagging
- E. Merge Review

**ANSWER: C**

## QUESTION NO: 10

You want to allow regular users to configure limited aspects of a job but not allow them to change everything. What Jenkins mechanism do you use?

- A. Build parameters
- B. Matrix based security
- C. Job Configuration Restriction plugin
- D. Declarative Pipeline
- E. System environment variables

**ANSWER: A**
