QUESTION NO: 1

What are the network side (uplink) interface types provided by MA5600?

A. STM-1

B. FE

C. IMA

D. GE

ANSWER: B D

QUESTION NO: 2

When the MA5600 service box provides pure broadband service, how many slots can be inserted into the service board?

A. 12

B. 14

C. 16

D. 18

ANSWER: B

QUESTION NO: 3

When MA5600T is newly launched and connected to the network management system, which of the following descriptions are correct?

A. The interface IP address of the MA5600T used for management must be in the same network segment as the network management IP address

B. The configuration of the SNMP version should be the same as the configuration on the U2000 side

C. The configuration of read community name and write community name is the same as that on the network management side.

D. Add a static route, the destination address is the network segment where the network management IP is located

ANSWER: B C D

QUESTION NO: 4

What are the following commands that belong to the H.248 protocol?

A. Ringing

B. Subtract

C. Notify

D. Move

ANSWER: B C D

QUESTION NO: 5

Which of the following statements about ATM network VP and VC is correct?

A. A VP can include multiple VCs;

B. A VC can include multiple VPs;

C. VPI occupies the same number of bits in all cells, and the same is true for VCI;

D. There is no logical connection between VP and VC.

ANSWER: A

QUESTION NO: 6

According to the ITU-T G.984.x series of standards, what are the upstream and downstream bandwidths of GPON?

A. 2.5Gbps/2.5Gbps

B. 1.25Gbps/2.5Gbps

C. 1.25Gbps/1.25Gbps

D. 2.5Gbps/1.25Gbps

ANSWER: B

QUESTION NO: 7

When adding on-lineprofile to MA5680T, what needs to be configured?

A. Configure the vlan of the ONT ETH port

B. Add DBA template

C. Binding tcont and DBA template

D. Add gemport, configure gemport mapping relationship

ANSWER: C D

QUESTION NO: 8

VLAN division includes which of the following methods?

A. Based on port

B. Based on MAC address

C. Based on agreement

D. Based on physical location

ANSWER: A B C

QUESTION NO: 9

Is the following description correct? MA5680T supports template mode and discrete configuration mode to configure FTTH services. In template mode configuration, use the ont-profile add command to configure the ONT.

A. True

B. False

ANSWER: B

QUESTION NO: 10

When testing the average transmit optical power of an optical interface, which of the following descriptions are incorrect?

A. The optical fiber connector and the optical connector on the optical interface board panel are clean and well connected

B. The optical power meter is calibrated

C. Connect one end of the test pigtail of the optical power meter to the "Rx" port of the optical interface board, and connect the other end of the pigtail to the optical power meter. D. Repeat several times to check whether the maximum and minimum measured average transmit optical power meet the technical requirements.

ANSWER: C

QUESTION NO: 11

Which of the following modules is not a functional module of the MA5600 SCU main control board?

A. CPU module

B. Ethernet switch module

C. Clock module

D. Separator module

ANSWER: D

QUESTION NO: 12

Which of the following descriptions of MUX vlan characteristics is correct?

A. There are two types of ports: uplink port and service virtual port

B. A MUX VLAN can contain multiple uplink ports and multiple service virtual ports C. Layer 2 interworking between different MUX VLANs

C. MUX VLAN is mainly used for community access.

ANSWER: A

QUESTION NO: 13

During the configuration of the EPON PPPoE service, what templates need to be configured to increase the MDU?

A. System parameter template

B. Traffic template

C. Route template

D. DBA template

ANSWER: C D

QUESTION NO: 14

What factors affect the actual line rate of ADSL business?

A. Line length

B. Wire diameter

C. Interference

D. Wiring situation

ANSWER: A B C D

QUESTION NO: 15

onIPWhich statement is correct in terms of routing?

A. Routing isOSIThe concept of the second layer in the model.

B. Any route must include the following three parts of information: source address, destination address, and next hop.

C. In a local area network, routing includes the following two parts:IPAddress andMACaddress.

D. IPRouting is the guideIPPath information for packet forwarding.

ANSWER: D
