QUESTION NO: 1

Which two of the following support Cloud Pak for Integration deployments?

- A. IBM Cloud Code Engine
- B. Amazon Web Services
- C. Microsoft Azure
- D. IBM Cloud Foundry
- E. Docker

ANSWER: A D

QUESTION NO: 2

Which queue manager includes a pair of pods, one of which is the active queue manager and the other of which is a standby?

- A. Native HA
- B. Multi-instance
- C. Single Resilient
- D. Replicated Data

ANSWER: B

QUESTION NO: 3

Which statement is true about App Connect Designer?

- A. Only one instance of App Connect Designer can be created in a namespace.
- B. For each App Connect Designer instance, a corresponding toolkit instance must be created.
- C. Multiple instances of App Connect Designer can be created in a namespace.
- D. App Connect Designer must be linked to a toolkit for validation.

ANSWER: C

QUESTION NO: 4 - (DRAG DROP)

Select all that apply

What is the correct sequence of steps to delete IBM MQ from IBM Cloud Pak for Integration?

Unordered Options	Ordered Options
Delete Queue Managers.	
Log in to your OpenShift cluster's web console.	
Uninstall the Operator.	
Select Operators from Installed Operators in a project containing Queue Managers.	

ANSWER:

Unordered Options	Ordered Options
Delete Queue Managers.	Log in to your OpenShift cluster's web console.
Log in to your OpenShift cluster's web console.	Select Operators from Installed Operators in a project containing Queue Managers.
Uninstall the Operator.	Delete Queue Managers.
Select Operators from Installed Operators in a project containing Queue Managers.	Uninstall the Operator.

QUESTION NO: 5

Which statement is true about the removal of individual subsystems of API Connect on OpenShift or Cloud Pak for Integration?

- A. They can be deleted regardless of the deployment methods.
- B. They can be deleted if API Connect was deployed using a single top level CR.
- C. They cannot be deleted if API Connect was deployed using a single top level CR.
- D. They cannot be deleted if API Connect was deployed using a single top level CRM.

ANSWER: C

QUESTION NO: 6

Which two storage types are required before installing Automation Assets?

- A. Asset data storage - a File RWX volume
- B. Asset metadata storage - a Block RWO volume
- C. Asset ephemeral storage - a Block RWX volume

- D. Automation data storage - a Block RWO volume
- E. Automation metadata storage - a File RWX volume

ANSWER: A B

QUESTION NO: 7

Given the high availability requirements for a Cloud Pak for Integration deployment, which two components require a quorum for high availability?

- A. Multi-instance Queue Manager
- B. API Management (API Connect)
- C. Application Integration (App Connect)
- D. Event Gateway Service
- E. Automation Assets

ANSWER: A B

QUESTION NO: 8

Assuming that IBM Common Services are installed in the `ibm-common-services` namespace and the Cloud Pak for Integration is installed in the `cp4i` namespace, what is needed for the authentication to the License Service APIs?

- A. A token available in `ibm-licensing-token` secret in the `cp4i` namespace.
- B. A password available in `platform-auth-idp-credentials` in the `ibm-common-services` namespace.
- C. A password available in `ibm-entitlement-key` key in the `cp4i` namespace.
- D. A token available in `ibm-licensing-token` secret in the `ibm-common-services` namespace.

ANSWER: C

QUESTION NO: 9

An API Connected administrator runs the command shown below:

```
[root@geti-inf ~]# oc get po
```

Given the output of the command, what is the state of the API Connect components?

- A. The Analytics subsystem cannot retain historical data.
- B. Developer Portal sites will be unresponsive.
- C. Automated API behavior testing has failed.
- D. New API calls will be rejected by the gateway service.

ANSWER: D

QUESTION NO: 10

Which two authentication types are supported for single sign-on in Foundational Services?

- A. Basic Authentication
- B. OpenShift authentication
- C. PublicKey
- D. Enterprise SAML
- E. Local User Registry

ANSWER: B D
