QUESTION NO: 1

In your calculation view, you want to consume a custom data source defined using SQLScript. In which type of object do you write your code?

- A. Scalar function
- B. Table function
- C. Anonymous block
- D. Procedure

ANSWER: B

QUESTION NO: 2

You have imported calculation views from SAP HANA on-premise to SAP HANA Cloud. Why should you switch calculated column expression language from column engine to SQL?

- A. To benefit from additional SQL optimizations
- B. Incorrect aggregations may be generated
- C. Column engine language is not supported.
- D. To define limits for query unfolding

ANSWER: A

QUESTION NO: 3

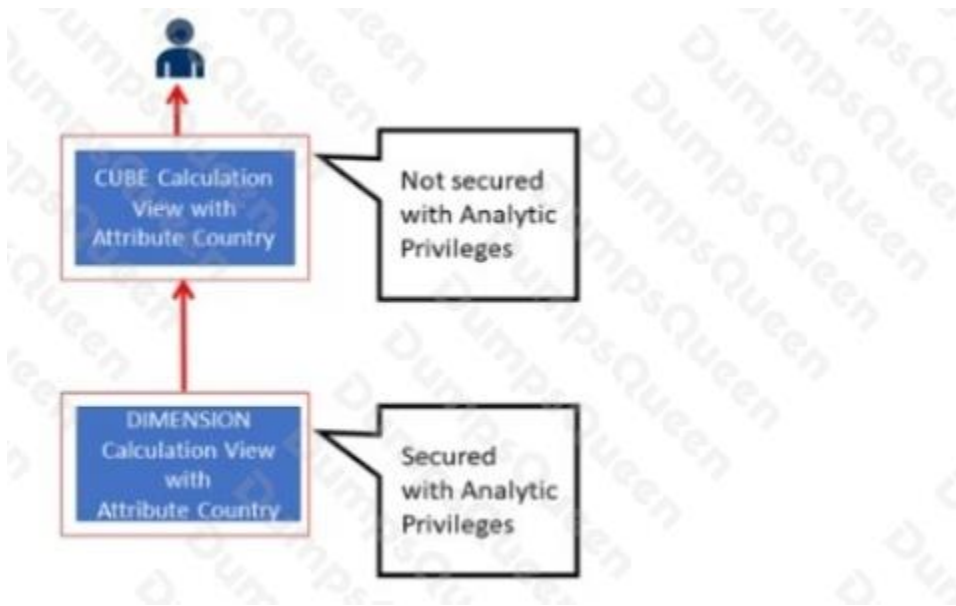

In Business Application Studio, you rename a DIMENSION calculation view that is used by a CUBE calculation view. You do NOT use the option to rename the runtime view and adjust the reference. Afterward, you perform the following deploy operations: Deploy the DIMENSION calculation view as a single object. Deploy the entire SAP HANA database module. What is the outcome of the deploy operations?

- A. The first deployment is successful. The second deployment fails.
- B. The first deployment is successful. The second deployment is successful.
- C. The first deployment fails. The second deployment fails.
- D. The first deployment fails. The second deployment is successful.

ANSWER: B

QUESTION NO: 4

Referring to the diagram,

which privileges would a user require to view United States data when querying the CUBE calculation view?

- A. A SELECT privilege on the CUBE calculation view and an Analytic Privilege (Country = United States) on the DIMENSION calculation view
- B. A SELECT privilege and an Analytic Privilege (Country = United States) on the DIMENSION calculation view
- C. A SELECT privilege and an Analytic Privilege (Country = United States) on the CUBE calculation view
- D. SELECT privileges and Analytic Privileges (Country = United States) on both views

ANSWER: A

QUESTION NO: 5

Why does SAP issue warnings about the use of imperative or procedural SQLScript statements?

- A. They can limit parallelization of query execution.
- B. They introduce potential security risks.
- C. They could modify the database.
- D. They call multiple processing engines.

ANSWER: B

QUESTION NO: 6

What are the consequences of NOT executing a delta merge? Note: There are 2 correct answers to this question.

- A. Read performance decreases.
- B. New records are not read.
- C. Memory is not optimized.
- D. Aggregates are not adjusted.

ANSWER: A B

QUESTION NO: 7

In a calculation view, why would you implement an SQL expression? Note: There are 3 correct answers to this question.

- A. To generate hierarchies
- B. To define a filter
- C. To convert currencies
- D. To generate a restricted column
- E. To generate a calculated column

ANSWER: B D E

QUESTION NO: 8

Why would you choose an HDI-shared service plan instead of a schema service plan? Note: There are 3 correct answers to this question.

- A. You want to use SAP Business Application Studio.
- B. You want to use containers to isolate objects.
- C. You want to develop calculation views.
- D. You want to create database objects using source files.
- E. You want to use synonyms to access external data.

ANSWER: A B D

QUESTION NO: 9

What are some of the typical roles in an SAP HANA Cloud implementation?Note: There are 2 correct answers to this question.

- A. Data architect
- B. Modeler
- C. Kubernetes expert
- D. ABAP developer

ANSWER: A B

QUESTION NO: 10

You have imported a new calculation view in a folder that contains an .hdinamespace file. This calculation view consumes one data source, which is a table. When trying to deploy the calculation view, the deployment fails with a namespace-related issue.What could be the reason?Note: There are 2 correct answers to this question.

- A. The namespace used within the calculation view to reference the table is different from the actual namespace in the identifier of this table.
- B. The imported calculation view and its data source have different namespaces.
- C. An .hdinamespace file is defined in the SRC folder that specifies a different namespace property than the one in the identifier of the calculation view.
- D. The .hdinamespace specifies "sub-folder":"append", so calculation views can only be created in subfolders.

ANSWER: A B
