QUESTION NO: 1

The customer decided to remove the Caveonix RiskForesight all-in-one service from the IBM Cloud and move to a distributed model for VMware Solutions. By default, IBM automatically deletes only the single deployed all-in-one Caveonix VM and the dedicated private subnet that was ordered for it. What are the key considerations? (Select Two)

- A. If you used the IP addresses of the dedicated private subnet on additional VMs, those VMs must be ^ assigned new IP addresses to continue to function
- B. Old configurations can be deleted and migrated to a new environment
- C. If you scaled out the Caveonix VM into multiple VMs, those additional VMs are not removed
- D. Delete the VM and Storage allocation, Cavenoix RiskForesight will discontinue data gathering and services are deemed stopped
- E. Unsubscribe the license and remove the instance of all-in-one deployment in the VMware solutions, release the IP address to DHCP, DNS servers

ANSWER: A C
