One change control function that is required in client/server environments, but is not required in mainframe environments, is to ensure that:

- A. Program versions are synchronized across the network.
- B. Emergency move procedures are documented and followed.
- C. Appropriate users are involved in program change testing.
- D. Movement from the test library to the production library is controlled.

**ANSWER: A**

## QUESTION NO: 3

Which of the following is classified as a product cost using the variable costing method?

- 1. Direct labor costs.
  - 2. Insurance on a factory.
  - 3. Manufacturing supplies.
  - 4. Packaging and shipping costs.
- A. 1 and 2.
  - B. 1 and 3.

C. 2 and 4.

D. 3 and 4.

**ANSWER: D**

## QUESTION NO: 4

The audit committee of a global corporation has mandated a change in the organization's business ethics policy. Which of the following approaches describes the best way to accomplish the policy's diffusion worldwide?

- A. Deploy the policy in the corporate headquarters' language, so everyone gets an unfiltered version simultaneously.
- B. Introduce the policy region by region, using any lessons learned to change the subsequent version of the policy for the next area.
- C. Consult with legal and operational management in each affected country to ensure the final version can be implemented globally, following audit committee approval.
- D. Send the board-approved version of the policy to each country's senior leadership, and empower them to tailor the policy to the local language and culture.

**ANSWER: C**

## QUESTION NO: 5

Which of the following is a project planning methodology that involves a complex series of required simulations to provide information about schedule risk?

- A. Monte Carlo Analysis.
- B. Project Management Information System (PMIS)
- C. Earned Value Management (EVM).
- D. Integrated Project Plan.

**ANSWER: A**

## QUESTION NO: 6

According to IIA guidance on IT, which of the following best describes a logical access control?

- A. Require complex passwords to be established and changed quarterly.
- B. Require swipe cards to control entry into secure data centers.
- C. Monitor access to the data center with closed circuit camera surveillance.
- D. Maintain current role definitions to ensure appropriate segregation of duties.

**ANSWER: D**

**Explanation:**

Reference: <https://www.sciencedirect.com/topics/computer-science/logical-access-control>

## Logical access controls

Logical access controls are the features of your system that enable authorized personnel access to resources. To many folks, distinguishing between logical access control and I&A is confusing. Logical access controls are those controls that either prevent or allow access to resources once a user's identity already has been established. Once a user is logged in, they should have access only to those resources required to perform their duties. Different user groups usually have access to different resources, which ensures a separation of duties. Describe how the separation of duties occurs. A good portion of this discussion should be about account management. User accounts are usually part of a role-based group. Describe the names of each role and what resources each role has access to. The resources that you will want to take into consideration include systems, directories, network shares, and files. You can summarize this information in a table similar to Table 16.8.

**QUESTION NO: 7**

A bond that matures after one year has a face value of \$250,000 and a coupon of \$30,000. If the market price of the bond is \$265,000, which of the following would be the market interest rate?

- A. Less than 12 percent.
- B. 12 percent.
- C. Between 12.01 percent and 12.50 percent.
- D. More than 12.50 percent.

**ANSWER: A**

## QUESTION NO: 8

If legal or regulatory standards prohibit conformance with certain parts of The IIA's Standards, the auditor should do which of the following?

- A. Conform with all other parts of The IIA's Standards and provide appropriate disclosures.
- B. Conform with all other parts of The IIA's Standards; there is no need to provide appropriate disclosures.
- C. Continue the engagement without conforming with the other parts of The IIA's Standards.
- D. Withdraw from the engagement.

**ANSWER: A**

## QUESTION NO: 9

Which of the following is a result of implementing an e-commerce system, which relies heavily on electronic data interchange and electronic funds transfer, for purchasing and billing?

- A. Higher cash flow and treasury balances.
- B. Higher inventory balances.
- C. Higher accounts receivable
- D. Higher accounts payable.

**ANSWER: D**

## QUESTION NO: 10
