## QUESTION NO: 1

Which of the following constitutes Huawei's public cloud ecosystem?

- A. Huawei Cloud Academy
- B. Partner
- C. Huawei Cloud Market
- D. Developer Center

ANSWER: A B C D

## QUESTION NO: 2

load balancer can be used alone

- A. True
- B. mistake

ANSWER: B

## QUESTION NO: 3

Which of the following methods can delete a cloud server created by elastic scaling?

- A. Disable the elastic scaling group
- B. Add a scaling strategy to delete cloud servers in the scaling strategy
- C. Manually modify the expected number of instances of the scaling group
- D. "Remove the scaling group and delete" the instance that needs to be deleted

ANSWER: B C D

## QUESTION NO: 4

When creating a file system, Which of the following parameters need to be configured?

- A. File system type
- B. File system interface
- C. VPC
- D. Maximum capacity

**ANSWER: A C D**

## QUESTION NO: 5

Which of the following functions does RDS provide?

- A. Users can set alarm rules for relational database
- B. Users can set automatic backup strategies and create manual backups, And use the backup to restore the database instance
- C. Cloud DBA can help you conduct a comprehensive analysis of the instance, Centralized reflection of the performance and operating status of the database instance. Via Cloud D
- D. BA diagnosis and diagnosis opinions, You can maximize the discovery of existing or potential health problems in the database, And deal with it in time
- E. Users can create and delete database instances, Modify the database port number

**ANSWER: A B C D**

## QUESTION NO: 6

Which of the following load methods are not supported by the listener?

- A. Maximum connection
- B. No weight
- C. Minimum connection
- D. polling

**ANSWER: A B**

## QUESTION NO: 7

Financial insurance users who apply for reimbursement need to provide ID cards, medical documents and other materials. Through image recognition services, information can be automatically entered and verified and proofread.

- A. True
- B. False

**ANSWER: A**

## QUESTION NO: 8

Which of the following options does a VPN consist of?

- A. VPN connection
- B. Subnet
- C. VPN gateway
- D. VPC

**ANSWER: A C**

## QUESTION NO: 9

Which of the following is wrong about the description of the elastic public network IP?

- A. It can be flexibly bound and unbound with resources such as elastic cloud servers, virtual IP, elastic load balancing, and NAT gateways.
- B. EIP can add shared bandwidth to reduce bandwidth usage costs.
- C. Elastic public IP (ElasticIP) provides independent public IP resources, including public IP addresses and public network export bandwidth services.
- D. Only support billing on demand.

**ANSWER: D**

## QUESTION NO: 10

Which of the following data cannot be monitored in the object storage service console?

- A. Number of objects
- B. Traffic Statistics
- C. Storage usage
- D. Abnormal statistics

**ANSWER: D**

## QUESTION NO: 11

Vulnerability Scanning Service can repair the vulnerabilities scanned

- A. is correct
- B. mistake

**ANSWER: B**

## QUESTION NO: 12

cloud traditional file sharing storage compared, What are the advantages of SFS?

- A. File Sharing
- B. High reliability
- C. Seamless integration
- D. Simple operation but high cost

**ANSWER: A B C**

## QUESTION NO: 13

Which of the following are the application scenarios of elastic load balancing?

- A. Realize more flexible service forwarding
- B. Shield the real ip from the outside to achieve the purpose of security protection
- C. Provide routing balancing capabilities based on domain names and URLs
- D. Suitable for web services with large traffic

**ANSWER: A B C D**

## QUESTION NO: 14

HUAWEI CLOUD Elastic Cloud Server connects to the public network(Internet) What are the ways?

- A. Cloud monitoring
- B. NAT gateway
- C. Elastic public network ip
- D. Elastic load balancing

**ANSWER: B C**

## QUESTION NO: 15

What is wrong with the statement about the removal of instances of the scaling group?

- A. When the number of expected instances of the scaling group is less than the current number of instances, the scaling group will remove redundant instances.
- B. You can configure the instance removal strategy as needed.
- C. Instances manually moved in will not follow "Instance removal strategy" Requirement and has the lowest priority when it is removed.
- D. When the scaling group is moved out of the instance, the balance of the availability zone will not be considered.

**ANSWER: A**

## QUESTION NO: 16

In case of disk data loss, you can use the pre-created backup()Perform data recovery.

- A. createNew disk
- B. delete
- C. Restore data to the original disk
- D. Unmount disk

**ANSWER: A C**

## QUESTION NO: 17

The fragments are junk data generated in the process of uploading objects.

- A. True
- B. mistake

**ANSWER: A**

## QUESTION NO: 18

Which of the following is wrong about the description of the virtual interface?

- A. When deleting a virtual interface, you need to delete the virtual gateway and physical leased line bound to it first
- B. Currently the virtual interface supports dynamic routing protocol (BGP)
- C. The virtual interface associates the user gateway with the virtual gateway to realize the function of accessing the VPC from the local data center
- D. The virtual interface is the entrance to the user's local data center to access the VPC

**ANSWER: A**

## QUESTION NO: 19

Enterprise Host Security provides functions such as account cracking protection, malicious program detection, critical file change detection, Web directory management, container escape detection, and software vulnerability detection.

- A. True

**B. False**

**ANSWER: A**

## **QUESTION NO: 20**

After mounting the newly purchased cloud hard disk to the cloud server, it can be used directly.

**A. True**

**B. mistake**

**ANSWER: B**
