QUESTION NO: 1

Which options can the end user edit in the User page?

Note: There are 2 correct answers to this question.

- A. Default Dictionary
- B. Default Pricebook
- C. Domain Name
- D. User Type

ANSWER: A B

QUESTION NO: 2

Your customer has a requirement where the maximum allowed discount for all products with "Accessory product Type is 20%, except for user Type "Manager", who are allowed to discount up to 30% on all products, what is the standard way to implement his requirement?

A. * Write a custom cart calculation script of Row Type "Cartitem" to reset the item discount to 0 If current User Type is manager and the discount is over 30.

* Write a Custom Cart Calculation Script of Row Type Cartitem to reset item discount to 0 if the current user type is not manager and the discount is over 20.

B. * Create two rules in Discounts/Multipliers, one for product Type "Accessory" with a maximum value of 20 and condition [NEQ] (<*CTX(Visitor.UserTypeName) *, manager) * Create the other for product Type Accessory with a maximum value of 30 and condition [EQ] (<*CTX Visitor. UserType.Name) >,Manager)

C. * Create a Quote Item Custom Field "maximum Discount" with a calculation of [if] ([EQ] (<*CTX (visitorType.Name)>, manager)) {30}{200} [ENDIF]

* Create a rule in Discounts/multipliers for product Type "Accessory" with a maximum value of * > CTX (Quote.Currentitem.CustomField(maximum Discount))* >

D. * Create two rules in Discounts/multipliers, one for product Type "Accessory" with a maximum value of 20, the other for user Type 'Manager' with a maximum value of 30.

* In Discounting Priorities, ensure user Type has a lower Rank than product type.

ANSWER: D
