A. active selling

B. purchasing

C. selling

D. services

E. master

F. supplier

ANSWER: A C E

QUESTION NO: 6

A point of sale (POS) system is connected to a central application server at the enterprise level. Network is unavailable and the POS system is not able to connect, but stores still need to service customers. The store would like to operate in offline mode and transfer data to the server once the network is back.

How can an implementation professional model this requirement in the system?

- A. Run the Change data import agent for data synch from enterprise to store in DELTA synch mode
- B. Run the Change data export agent for data synch from enterprise to store in DELTA synch mode
- C. Run the Change data import agent for data synch from enterprise to store in FULL synch mode
- D. Run the Change data export agent for data synch from enterprise to store in QUICK synch mode

ANSWER: B

QUESTION NO: 7

In IBM Sterling Order Management (OMS), an implementation professional needs to define the menu options that a specific user will see. How should this requirement be configured?

- A. Default menu options can be modified in the profile properties file created in the OMS installation folder
- B. Personalized menu options can be developed using pre-defined Java class files located in the /externalDeployments folder.
- C. New menu options can be configured in the Application Manager. This menu will be defined for a specific user, so it is not necessary to include this new menu in menu groups.
- D. New menu options for a specific user can be defined in the Application Manager As with any other menus options defined in the solution, it should be included in a menu group.

ANSWER: D

QUESTION NO: 8

An electronic retailer offers installation services for Home Theater systems, and the customer has the option of selecting this service at the time of order Placement.

How should the implementation professional set the service item configuration to fulfill this servicing requirement?

- A. Special Services
- B. Delivery Services
- C. Value-Added Services
- D. Provided Services

ANSWER: D

QUESTION NO: 9

Sales orders are being purged using the ORDER_PURGE transaction for which the retention days period is defined to be 30 days. How does the purge agent select the orders that need to be purged?

- A. It selects those orders from the YFS_TASK_Q table that are available (AVAILABLE, DATE <= SYSDATE) for PURGE transaction
- B. It selects those orders from the YFS_ORDER_AUDIT table that don't have an order audit record created in the last 30 days or more.
- C. It selects those orders from the YFS_ORDER_HEADER table that have been in 'Shipped'" status for 30 days or more.
- D. It selects those order lines from the YFS_ORDER_HEADER table that have been in 'Shipped" status for 30 days or more.

ANSWER: A

QUESTION NO: 10

Which two statements related to Item Attribute are true?

- A. Categories managed by sub catalog organizations inherit attributes and attribute values from the catalog organization.
- B. When we assign a value to an attribute in a category, the value is not inherited by attributes in child categories, classifications, and items in those categories
- C. The item attribute domain is automatically created on defining the catalog organization.
- D. Multiple attribute domains can be present for a catalog organization.
- E. When we assign a value to an attribute in a category, the value is inherited by attributes in child categories, classifications, and items in those categories

ANSWER: C E
