QUESTION NO: 9

Because of which security threat would you need to make additional configuration settings to run the SAP Fiori Launchpad from within your SAP NetWeaver Portal?

- A. Cross-Site Request Forgery
- B. Clickjacking
- C. Content Spoofing
- D. Cross-Site Scripting

ANSWER: B

QUESTION NO: 10

The security administrator is troubleshooting authorization errors using transaction SU53. While running transaction MM50, the user received the following error: "You are not authorized to use transaction MM01"

The user's position in the organization makes it inappropriate for them to have direct access to transaction MM01 because it creates a Segregation of Duties conflict.

What would cause the system to run an authority check using object S_TCODE for transaction MM01 while running transaction MM50?

- A.** The developer who wrote the program for transaction MM50 issues the ABAL command CALL TRANSACTION for transaction MM01
- B.** The instance parameter auth/no_check_in_some_cases has been set to Y
- C.** The proposal value for the object S_TCODE in the SU24 data for transaction MM50 was incorrectly set to YES
- D.** MM01 was maintained as the CALLING transaction in table TCDCOUPLES with field OKFLAG value X

ANSWER: A
